

15+ Powerful & Surprising Tips to Answer Questions Smartly

Tiju's Learning – Free NCLEX-RN Strategy Guide

15+ Powerful Tips to help you answer NCLEX-RN questions correctly

01

Read the Last Line First

If the question is long, read the **last sentence first**.

Example:

"What is the nurse's priority action?"

Now you immediately understand what the question is asking.

02

Look for Strategic Words

Important words that change the answer:

- Priority
- Best
- Initial
- First
- Most Important

These mean **all options may be correct**, but you must choose the **most important one**.

03

Eliminate Absolute Words

Be careful with words like:

- Always
- Never
- Only
- Must

These are **usually incorrect** in NCLEX questions.
Eliminate them first.

04

Patient Safety First

NCLEX focuses heavily on **patient safety**.

Example:

Stable patient vs Fall-risk patient

Choose: **Fall-risk patient**

05

ABC Rule (Airway, Breathing, Circulation)

Priority Order:

1. Airway
2. Breathing
3. Circulation

Example:

Breathing difficulty vs Fever

Choose: **Breathing difficulty**

06

Maslow's Hierarchy Rule

Priority Order:

1. Physical needs
2. Safety
3. Emotional
4. Social

Example:
Pain vs Anxiety
Choose: **Pain first**

07

Stable vs Unstable

Unstable patients always come first.

Example:
Stable patient vs Shortness of breath
Choose: **Shortness of breath**

08

Acute vs Chronic

Acute conditions take priority.

Example:
Chronic asthma vs Sudden breathing difficulty
Choose: **Sudden breathing difficulty**

09

New vs Old Symptoms

New symptoms are more dangerous.

Example:
Chronic headache vs Sudden severe headache
Choose: **Sudden severe headache**

10

Least Invasive First

Follow this order:

1. Assess
2. Non-invasive
3. Invasive

Example:
Give medication vs Check vital signs
Choose: **Check vital signs first**

11

Assessment Before Action

NCLEX prefers assessment first.

Example:

Patient reports pain

Don't: Give medication

Do: Assess pain level

12

Identify Keywords Carefully

Look for:

- First
- Immediate
- Best
- Priority

These words change the correct answer

13

Don't Overthink

NCLEX answers are often **simple and logical**.

Avoid overthinking.
Follow basic nursing principles.

14

Similar Options? Be Careful

If two options are very similar
Both are usually incorrect.

Look for a **clear and different answer**.

15

Choose Nurse-Focused Actions

Avoid:

- Call doctor immediately (unless emergency)
- Ignore patient complaints

Choose:

- Nursing interventions
- Patient safety actions

16

Trust Your First Instinct

Your first answer is often correct.
Avoid changing answers unnecessarily.

17

Read Every Word Carefully

Words like:

- Not
- Except
- Incorrect

These completely change the meaning of the question

18

Quick Priority Memory

Remember this order:

Airway
Breathing
Circulation
Safety
Pain
Acute
Unstable

Why Tiju's Learning for NCLEX-RN?

Features → What It Means for You (Deeper Benefits)

1

► Clinical Scenario-Based Training

Real NCLEX-style clinical questions

You learn **how to think like an NCLEX exam**, not just memorize.

This helps you **reduce confusion and choose correct answers faster**.

2

► NCLEX Smart Answering Strategies

Proven answering techniques & shortcuts

You understand **how to eliminate wrong answers** and **identify priority quickly**, improving your pass probability.

3

► Expert Mentorship & Guidance

Experienced trainers guiding you step-by-step

You avoid **common mistakes**, stay **focused**, and gain **confidence before exam**.

4

► NGN (Next Generation NCLEX) Focused Training

Latest NCLEX question pattern training

You won't be surprised at the exam. You'll feel **comfortable answering case-based questions**.

5

► **Structured Study Plan**

Step-by-step learning roadmap

No more confusion about **where to start** or **what to study next**.
You follow a **clear success path**.

6

► **Practice Questions & Mock Tests**

Regular practice exams

You improve time **management**,
confidence, and **exam performance**.

7

► **Personalized Support**

One-to-one doubt clarification

Your weak areas are **identified and improved quickly**.

8

► **Beginner-Friendly Training**

Simple & easy explanations

Even if you're **starting from the basics**, you can **learn confidently**.

9

► **Flexible Learning Options**

Flexible Classes

You can **learn at your convenience**
without affecting your job.

10

► **Proven Success Approach**

Strategy-based training method

You prepare **smarter**, not harder,
improving your **pass chances faster**.

*"Stay Focused. Stay Consistent. Your Hard Work
Will open doors to a beautiful nursing career."*
